

Product Description

ANGLOMOIL TRIPLE S 90 GEAR OIL is a 100% synthetic gear oil specially formulated for marine gearboxes, motor cycle gearboxes and some cars and trucks

Under arduous conditions, marine and motor cycle gearboxes generate very high temperatures and marine gearboxes can be further stressed by infiltration of water.

Anglomoil Triple S 90 Gear Oil is formulated to provide long service life under these conditions, providing excellent oxidation stability, good demulsibility in the presence of water and protection against corrosion.

In gearboxes fitted with synchromesh, some extreme pressure additives can interfere with the action of the synchromesh, causing harsh gear changes. Triple S 90 contains extreme pressure additives to provide GL-4 gear performance level, but by careful formulation, does not interfere with synchromesh action.

Recommendation

Use **Anglomoil Triple S 90** in gearboxes requiring an oil meeting GL-4 performance level with a viscosity of SAE 90. It is specially recommended for marine and motor cycle gearboxes

Viscosity at 100° C	19 -- 20 cSt
Density	0.863
Flash Point	> 200 degrees C
Pour Point	< -20 degrees C
Colour	Blue

Anglomoil Superior Lubricants

Lubricants for Automotive - Industry - Food - Farm Machinery - Marine - Earthmovers - Road Transport
